Professional Biography of Jan deMeer:

Jan de Meer graduated on Electrical Engineering from the University of Applied Sciences in Würzburg/Schweinfurt, Germany and on Theoretical Computer Sciences from Technical University Berlin, Germany. He also holds a Deep-Sea Sailor Diploma from the Deep Sea Sailor School Lübeck Germany.

He is undertaking University lectures on Networking, IT Security and Multipurpose Chip Card Technology at several Universities of Applied Sciences, i.e. TFH Berlin, Online University Brandenburg, the private OTA University on Business Berlin etc.

He published over 110 papers in recognized journals and speeches at conferences which are sponsored of the professional organizations of IFIP, ACM, IEEE, GI and Smart University Sophia Antipolis.

His combined scientific and industrial career opened him doors to technology transfer activities supporting partners from industry, SME and academia.

In Cooperation with leading scientists from Information Technology (University of Montreal), Physics (IHP Frankfurt/Oder) and Economy (ZAB/IRC Frankfurt/Oder) he launched in summer 2007 the scientific technology enterprise aiming at Technology Transfer and ICT Business Education.
